

## ADVENTURER CAMERA BAG

### APPLICATION

For carrying professional digital SLR camera with full frame, and with grip and lens attached.

### PROPERTIES

The interior of the main chamber is lined with soft material to protect against scratches. It has the properties similar to velcro, which allows you to freely organize the space with the help of detachable partitions.

The walls are filled with a resilient foam to protect the camera from mechanical damage, for example, as a result of falling, while retaining rigidity enough to compensate for the strain that occurs when the lens is attached to the camera body. The bottom is filled with stiffer material as this side is particularly vulnerable to mechanical damage.

Flap with rain collar closed with a buckle and zipper. Front velcro-fastened pocket is designed to hold the lens cover when the camera is operating. At the sides of the main compartment, there are two flat pockets for cables and wires.

On the back is an interlaced webbing system, compatible with MOLLE/PALS (NATO standard). This allows you to attach a bag to tactical and multi-purpose belts, vests, backpacks and chestriqs, as well as to a regular trouser belt. MOLLE webbing on the sides and on the bottom of the cover allow you to extend the set with pockets for additional lenses, flashlights or cargo pouches, or to attach a tripod or jacket.

The shoulder strap is adequately bold and contoured, and fastened to the rotary latch for maximum comfort. It can also be easily and quickly unfastened. There are also two panels of soft velcro on it.

### MATERIALS

<b>Fabrics:</b>	Cordura, nylon, velcro-like
<b>Webbing:</b>	Polyamide 25, 30, 40 and 50 mm Velcro 25 and 50 mm
<b>Fill:</b>	Foam 10 and 20 mm
<b>Zippers:</b>	YKK
<b>Buckles:</b>	Duraflex, YKK
<b>Finish:</b>	Paracord, trimming

## VARIANTS

**Regular**

Main chamber dimensions: 8" x 7.5" x 4"

**Large**

Main chamber dimensions: 9" x 9" x 7.5"
