

LEO ADVANCED EQUIPMENT VEST

APPLICATION

Basic equipment mounting platform, compatible with MOLLE/PALS system, with the possibility to attach to the tactical belt.

PROPERTIES

It provides considerable space for attaching the pouches and pockets, and many options for configuring the equipment. The vest evenly distributes the weight of the tactical belt and the equipment on it. Front closed with a zipper. Adjustable height with shoulder straps. The waist width adjusts automatically with the use of elastic pullers. It has integrated rescue handle on the back. Mesh construction does not restrict air access to the body.

MATERIALS
