

## RAIDER CHESTRIG

### APPLICATION

Basic MOLLE/PALS MOLLE/PALS equipment mounting platform for tactical, rescue and civilian applications - e.g. for attaching photographic equipment pouches.

### PROPERTIES

The front features three PALS webbing panels. From the inside, the entire surface is covered with a mesh for improved comfort and air exchange. Between the layers of material is a flat pocket closed with velcro. Its interior is covered with velcro-like material, which facilitates the organization of content and attachment of accessories.

The cross-sewn suspenders allow for better distribution of the weight of the equipment and, while moving, the edges do not rub the wearer's neck even under heavy loads. Suspenders on the inside are lined with a soft mesh, which significantly enhances comfort and their flat profile allows for comfortable use with the backpack. Additional stabilization provides a transverse belt on the back.

### MATERIALS

<b>Fabrics:</b>	Cordura, spacing mesh, velcro-like
<b>Webbing:</b>	Polyamide 25, 40 and 50 mm Elastic 40 and 50 mm Velcro 50 mm
<b>Fill:</b>	Foam 3mm
